Project Proposal: Amazing Title

Shubham Tulsiani
Cranberry Lemon University

This is blank template, and only serves to constrain the page/margin/font size to ensure readability. Given that the projects/proposals can vary in scope and goals, there is no constraint on the sections you need to have.

That said, any proposal you submit should try to answer a few basic questions:

- What is the goal of the project, and why is it worth doing?

- What will you need to do to achieve this goal?

- How does your project relate to research/systems that exist?

- If you are doing something new in terms of an approach, why are current methods not sufficient? And what are your key ideas/insights that make you believe you might succeed?

- How will success be measured – qualitatively/quantitatively? Are there any datasets/metrics you plan to use for training/evaluation?
